

HEALTH Law

THE DISTINGUISHING FEATURE of the Law School's program in health law is its collaboration with the University's School of Medicine and its Medical Center, which is consistently ranked among the nation's top hospitals.

At Virginia, law students can study health law in the clinical setting, interacting with medical students and physicians from all medical specialties, including pediatrics, neurology, internal medicine (infectious disease and geriatrics) and psychiatry.

Law faculty teach in the School of Medicine and Medical School professors teach Law School classes. This collaboration extends to health policy experts in the Batten School of Leadership and Public Policy, the Darden School of Business, and the Schools of Architecture, Arts & Sciences, Engineering and Nursing.

STUDENTS BENEFIT from viewing the regulatory context through the eyes of physicians, inventors, health care administrators and experts from a variety of fields.

THIS INTERDISCIPLINARY APPROACH is further borne out through institutes and centers at UVA that allow students to study and work on pressing issues in health care, biotechnology, research, genetics and moral philosophy:

INSTITUTE OF LAW, PSYCHIATRY AND PUBLIC POLICY
 VIRGINIA CENTER FOR TRANSLATIONAL AND REGULATORY SCIENCES
 INSTITUTE FOR PRACTICAL ETHICS AND PUBLIC LIFE
 CENTER FOR BIOMEDICAL ETHICS
 CENTER FOR HEALTH POLICY
 CENTER FOR GLOBAL HEALTH

J.D.-M.P.H. (PUBLIC HEALTH) PROGRAM

In conjunction with the Department of Public Health Sciences at the School of Medicine, the Law School offers a dual degree

in public health through a program directed by Professors Ruth Gaare Bernheim and Richard Bonnie. Students have access to graduate courses in health policy and management, health economics, ethics, global

health, social and behavioral health, environmental health and research methodology.

Instituted in 2003, the M.P.H. program offers concentrations in generalist practice and research, health policy, and law and ethics,

and includes field placement options in global health, health policy and public health sites.

The program takes four years to complete and requires a minimum of 116 credits.

TWO
VIRGINIA LAW
PROFESSORS
ARE MEMBERS
OF THE
NATIONAL
ACADEMY OF
MEDICINE.

PROFESSOR RICHARD BONNIE, far left, has chaired 13 studies for the National Academies, ranging from tobacco policy to elder mistreatment. As director of the Institute of Law, Psychiatry and Public Policy, he is also helping the Virginia General Assembly overhaul the state's mental health laws.

PROFESSOR JOHN MONAHAN, near left, has directed two research networks on mental health law for the John D. and Catherine T. MacArthur Foundation.

STUDENTS IN THE YEARLONG HEALTH AND DISABILITY LAW CLINIC recently recovered or prevented the loss of \$267,000 for clients. Victories included the prevention of an area nursing home from evicting a senior patient without full use of his limbs. Three clients whose Medicaid was on the verge of being canceled were also spared from losing their benefits. PICTURED: Clinic instructor AMY WALTERS '09 with CHRISTINE BOTTOMLEY '18, GINA SATO '19, WINNIE MCBRIDE '19, instructor MARY FRANCES CHARLTON, LOUISA RICH '18 and AMANDA LINEBERRY '19.

J.D.-M.D. PROGRAM

Designed to educate the next generation of health leaders, the J.D.-M.D. program allows students to complete law and medical degrees in six years, instead of the seven years normally required if the degrees were pursued separately. Students spend the first three years and the summer of year five in classes at the School of Medicine,

and years four and five at the Law School. In the final year, one semester is spent in each school. Students are required to secure admission separately to the School of Medicine and UVA Law.

HEALTH AND DISABILITY LAW CLINIC

Students in the yearlong clinic help represent mentally ill and

elderly clients in negotiations, administrative hearings and court proceedings. The legal matters may involve civil rights, mental health care in jails and prisons, disability benefits claims, access to health or rehabilitative services, creating wills and other testamentary documents, and advance directives.

FELLOWSHIPS AND EXTERNSHIPS

Students may apply for funding from the Law School's health law fellowship program to work in a variety of settings. Students have worked for employers such as the Centers for Disease Control and Prevention's Public Health Law Program and the Food and Drug Administration.

COURSES AND SEMINARS

- Aging and the Law Lecture
- Bioethics and Law Internship Seminar: Health Policy and Administration
- Bioethics and the Law Seminar
- Biotechnology and the Law
- Current Issues in Law and Psychological Science
- Current Topics in Law, Medicine

- and Society
- Drug Product Liability Litigation Seminar
- Drug Product Liability Litigation: Principles and Practice
- Exercises in Rule-making – Society, Technology and the Law
- Food and Drug Law
- Food Law
- Genetics and the Law
- Health Care Marketplace:

- Competition, Regulation and Reform
- Health Law Survey
- Law and Ethics of Biotechnology
- Law of Adolescence
- Medical Malpractice and Health Care Quality
- Medicare Coverage, Payment and Compliance
- Medicare Practice Seminar
- Mental Health Law

- Public Health Law and Ethics
- Reproductive Ethics and Law Seminar on Mental Health Law Reform
- Topics in Health Care Reform

CLINIC

- Civil Rights Clinic
- Health and Disability Law Clinic

These courses represent the 2018-21 school years. Not all courses are offered every year.

For the fifth consecutive year, THE UNIVERSITY OF VIRGINIA MEDICAL CENTER was ranked the NO. 1 HOSPITAL IN VIRGINIA in the 2020-21 U.S. News & World Report rankings.

FACULTY:

LEADING SCHOLARS IN THE FIELDS OF PUBLIC HEALTH, BIOETHICS AND HEALTH LAW

Professors Richard Bonnie, Margaret Foster Riley and Christopher Ruhm are working to address various aspects of the opioid crisis. Bonnie chaired a study for the National Academies of Sciences, Engineering and Medicine that offered recommendations for curbing the problem. He and Professor Ruth Gaare Bernheim have co-authored casebooks on public health law and ethics.

A wide range of professors and doctors teach courses in the program or on related subjects.

For example, Lois Shepherd, the author of "If That Ever Happens to Me: Making Life Decisions after Terri Schiavo," teaches bioethics and reproductive ethics at the school.

SCHOOL OF LAW

- RICHARD J. BONNIE**
mental health law, health law, aging and the law, bioethics, public health law
